Rationale

S&P Global Ratings rates the Nebraska Public Agency Investment Trust (NPAIT) 'AAAm' based on its view of the quantitative characteristics of the fund's investments, as well as the strong and experienced fixed-income management team at investment advisor PMA Asset Management LLC.

For principal stability funds, we consider the sources of risk in a managed pool's portfolio and investment strategy and assess the impact that these risks could have on a fund's ability to maintain a stable or accumulating net asset value (NAV). These risks include credit quality; investment maturity; liquidity; portfolio diversification, index, and spread risk; management; and security-specific risks.

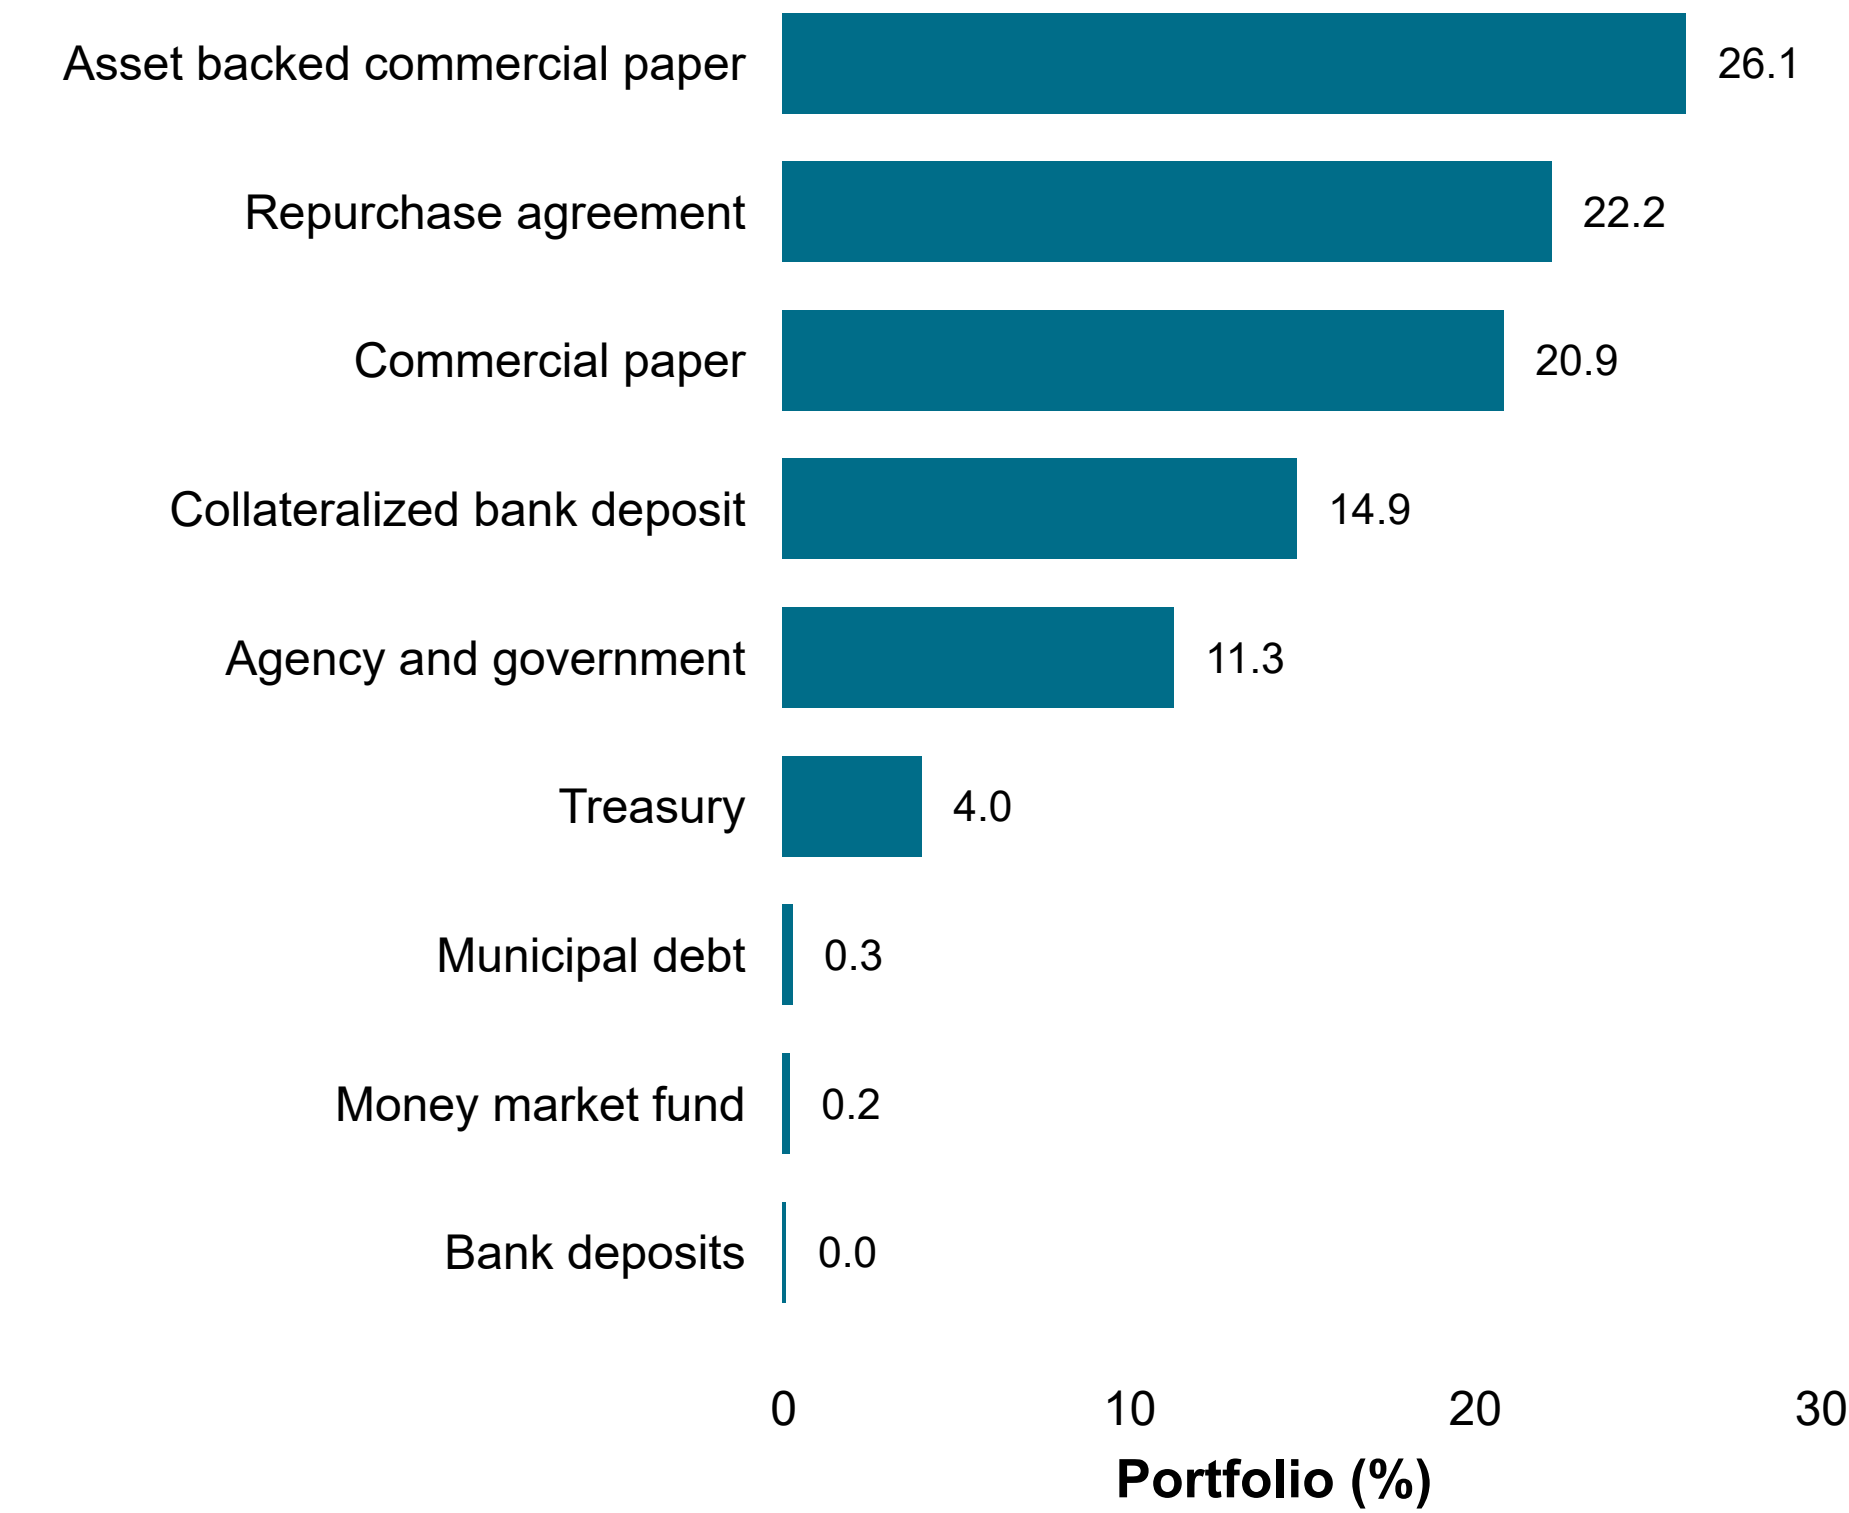

PMA Asset Management, LLC, and its affiliate, Public Trust Advisors, LLC, both doing business as PTMA Investment Advisors, provides investment advisory services primarily to public entities. In our view, the fixed-income management team of PTMA Investment Advisors is supported by a strong investment operations infrastructure and conservative investment practices that incorporate strict internal controls. We monitor NPAIT’s portfolio statistics and investment holdings on a weekly basis.

Fund statistics as of Sept. 25, 2025

Net asset value per share (\$)	Net assets (mil. \$)	Weighted average maturity (reset) - (days)	Weighted average maturity (final) - (days)	Seven-day yield (%)	30-day yield (%)
1.0003	1,036.67	44	68	4.07	4.21

Portfolio Assets

NPAIT is a collective effort of Nebraska public entities to invest funds jointly through a safe, efficient investment program. Designed and governed by public entities, NPAIT is managed with guiding principles focused on public entities and the communities they serve. The objective is to provide a high yield for the participants while maintaining liquidity and preserving capital by investing only in instruments permitted by Nebraska law. The pool seeks to maintain a stable value of \$1.00 per share.

As of Sept. 30, 2025, the portfolio comprised a diversified selection of high-quality money market instruments, including deposits, asset-backed commercial paper, commercial paper, municipal debt, U.S. government and agency securities, repurchase agreements, and money market funds.

History/Trends

To mitigate NPAIT’s sensitivity to interest rate fluctuations, the fund’s weighted average maturity to reset is actively managed within a 60-day limit. During the review period, the pool maintained an average weighted average maturity to reset of 37 days, aligning with its conservative approach. Reflecting its money market-like investment strategy, NPAIT’s return profile closely tracks the S&P Rated Government Investment Pool Index and generally varies in response to interest rate movements.

As of Sept 30, 2025, NPAIT reported assets under management of \$1.04 billion—an increase of approximately \$280 million year over year. Despite seasonal redemption cycles, the fund's assets have risen consistently over the past 12 months. In our view, its strong credit quality supports NAV stability, with an average of 65% of holdings rated ‘A-1+’ over the same period.
